

PROVIDING SOLUTIONS FOR ALL YOUR TREE SURGERY, FENCING, VEGETATION MANAGEMENT AND WEED CONTROL REQUIREMENTS IN WILTSHIRE AND ACROSS THE SOUTH WEST

WHERE COMMON SENSE IS STILL COMMON

## Case Study – Equestrian Centre near Chippenham Autumn 2017 until Summer 2018

**Background:** An initial project here led to other work which in turn led to us managing the project for this new build equestrian centre.

**Requirement:** The project included a new build equestrian school, stables and horse walker area. Inside there are stables, storage areas, washrooms and kitchen. The last image shows the electric gates just installed. Outside we erected 800m of post and rail fencing, 400m native hedge for screening the new building and 300m of mains power trenched and connected. Native hedging is important to the local eco systems, acting as the perfect shelter for local wildlife and some of the most popular native hedging is box, beech and hornbeam.

**Results/Benefits:** The owners have an attractive state-of-the art equestrian centre purpose built to their requirements, erected to a high specification with future proofing where possible.
